

**Current Alignment**  
Partial Cover Lowered

# Where could the cover be located and what could be on top of it?

- The maximum length of the cover is 900 feet
- To optimize its use, the cover has been placed where the maximum length is feasible, which is between Columbine and Clayton streets
- The cover options shown display different layout concepts
- Landscaping locations (such as trees) are dependent on the design of the cover, and may change as design advances
- Workshops will be held in the neighborhood to allow residents to assist the project team in designing the amenities on the cover
