

# The I-70 East PACT (Preferred Alternative Collaborative Team)

The Preferred Alternative Collaborative Team (PACT) is a group of stakeholders representing federal and state agencies, local governments, and community and business interests. This group was convened and managed by a neutral third-party mediation team from The Keystone Center to ensure inclusion of a range of perspectives. The PACT's purpose is to build mutual understanding of all interests, data, and concerns and recommend an alternative from the Draft EIS that meets the most interests and best addresses all concerns.
